VII. DISCUSSION

1. State of Indiana v. Tracey M. Rhodes, R.N., License No., 28142915A, Cause No., 2006 NB 0024 Objection to Respondent's Objection to the Findings of Fact

Mr. Rhodes submitted documents to the Indiana State Board of Nursing following the Board's final order issued June 27, 2008. The Board will take no action on the State's objection to Mr. Rhodes' documents, based on the Board's position that the documents do not construe a proper objection to the Board's final order, as the documents do not pertain to the evidence presented by the State and which were considered in arriving at the Board's order.

VIII. CHRONIC PAIN SUBCOMMITTEE RECOMMENDATION REPORT

Jim Ryser appeared before the Board on behalf of the Board's chronic pain management subcommittee and presented the following recommendations to the Board. Mr. Ryser explained that there are many nurses with active, unrestricted licenses dealing with chronic pain through the use of controlled substances and who the Board is never aware of. The Board only becomes involved when the State takes action against the nurse's license for failing a pre-employment drug test, for impairment, or for suspected diversion from the work place. Jim Ryser noted that nurses are not before the Board facing disciplinary action because of their chronic pain.

The Chronic pain management subcommittee recommends a program for those nurses with legitimate chronic pain issues and who are not eligible for ISNAP participation due to the use of controlled substances. These situations are imagined to be very limited due to the desire to have nurses only be able to utilize this program under very limited circumstances. The limited ISNAP alternative program and its terms will be issued as part of a probationary order against a nurse's license. The nurse must meet the following requirements to be eligible to the ISNAP alternative:

- Must have had 2 failed attempts at ISNAP participation
- Must provide full documentation / assessment from an approved treatment provider indicating the need for controlled substances that are prescribed for chronic pain management, anxiety, ADHD, or other medical condition. This documentation must also indicate that alternative treatment options were considered and attempted.
- INSPECT report over past 12 months must not indicate abuse of prescribed controlled substances or doctor shopping.

A nurse meeting the above criteria may be issued a probationary nursing license with the following terms:

- Treatment arranged through a Board approved provider, who will monitor all prescriptions for the nurse and will arrange for random urine drug screens, random pill counts, and INSPECT reports at the discretion of the provider. The treatment provider may also require periodic neuropsych testing and if the nurse changes drugs/doseage.
- Controlled substances work restriction for the length of the alternative program.
- Participation in a 12 step program.
- Quarterly reports from the treatment provider to the Board regarding the nurse's compliance with the terms of probation.
- Quarterly reports from any employer or employers.
- The use of long acting opiates for pain management purposes only.

The nurse participating in this alternative program may petition for modification of this probation upon proof of signing an RMA with ISNAP. Probation could then be modified to standard terms requiring compliance with and completion of an ISNAP RMA prior to petitioning for a withdrawal of that probationary status.

The Board requests the chronic pain management subcommittee to develop a list of approved treatment providers and criteria by which those treatment providers will be approved for use by nurses in the alternative monitoring program.
